

Easy Dewatering

100% Australian Designed & Owned

- Easy Handling
- Power, Water & Light
- Protect your Submersibles
- Flexible & Mobile
- Safer Servicing
- Rapid Deployment & Retrieval

PitRat®

The PitRat® is perfect for the safe and easy removal of submersible mining pumps from those difficult to get at places. This is a 3 in 1 system providing power, light and water all on a user-friendly mobile trailer matched to the client's needs.

PitRats® are generally sized to meet the clients' requirements to meet the pump duties with the float system, power source and trailer designed to meet the sites needs. Telescopic lighting plants and power outlets are available as optional extras.

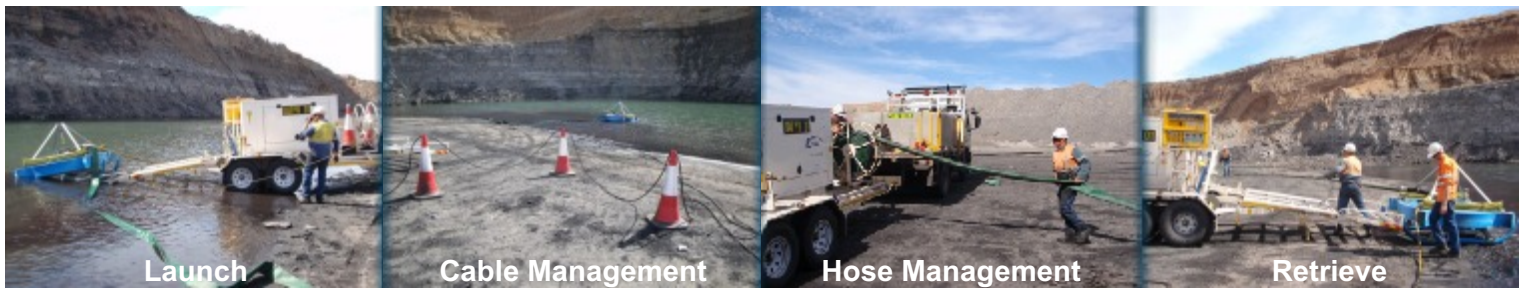

PitRats® are excellent for the rapid deployment and retrieval of heavy duty submersible mining pumps into and out of waters from any depth. The energy source is separated from the pump to provide flexibility in pump positioning, improve personnel water interface safety, assist with difficult site topography and allows safe efficient access for routine generator servicing.

- Hydraulic tilt deck and fold out ramp
- Strong steel construction
- Work platform and storage
- Modular pump float and skid systems
- Hose and cable reels with locking/braking mechanisms
- High Visibility rear lights to handle haul road mud/dust
- High Visibility safety marker cones and cable
